

HELP_O1_Materials' Analysis in context of O2

Feb 2015

Dear all,

We have a detailed O1 Overall Report prepared by Slovakian partner that was really needed when I was preparing "Topics' distribution" and "Overall Module Format" documents.

Yet, in order to use the survey results on all levels I made an analysis of answers to open questions presented by both healthcare professionals, students and teachers. Apart from repetitive answers about BBC, you.tube, skype and google.translator there are many others that show us sources for learning and teaching materials. Therefore I prepared a concise document for you with a list of useful websites, titles of medical books and others that were mentioned in the questionnaires.

Again – thank you Zuzana and Juan for generating the lists for me!

Please, treat this document as sharing good practice, even though some of them seem to be country specific:-) This is the moment when we can learn from our respondents!

Justyna
